Software Engineering | Backend | SQL | Python | Java

B.E. ECE (2023-2027)

EDUCATION

Bachelor of Engineering (ECE)

Sri Krishna College Of Engineering and Technology (SKCET)

2023 - 2027 - Under Graduate

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems.

TECHNICAL SKILLS

Languages: **Java**, Python, C++, JavaScript, SQL
Big Data: **PySpark**, **Kafka**
Databases: **MySQL, PostgreSQL**
Cloud : **AWS (EC2, S3, RDS, Elastic Beanstalk)**
Backend: **Spring Boot**, **Spring Data JPA**, Hibernate, REST APIs
Computer Vision: **OpenCV**, YOLOv8, MediaPipe FaceMesh
Tools : GitHub, Docker

PROJECT EXPERIENCE

Intelligent LeetCode Learning & Revision Platform

Spring Boot • PostgreSQL • Chrome Extension • AWS • React • TypeScript

- **Built** a Chrome extension to track LeetCode coding sessions, including problem metadata, time spent, submission attempts, and coding activity, integrated with a Spring Boot backend through REST APIs.
- **Developed** a secure, **multi-user backend** using **Spring Security**, **JWT authentication**, **refresh-token rotation**, **Spring Data JPA**, and **Hibernate**, with **user-scoped data access** and validation.
- Implemented performance analytics, confidence tracking, and **spaced-repetition scheduling** to generate personalized problem revision plans.
- **Deployed** the React dashboard using **AWS Amplify** and hosted the Spring Boot backend on **Elastic Beanstalk**, exposing APIs through **API Gateway** and using **Amazon RDS PostgreSQL** for persistent storage.

Real-Time E-Commerce Data Pipeline | Python • Kafka • PySpark • MySQL • AWS S3

- Built a **real-time data pipeline** to ingest e-commerce transaction events using **Apache Kafka** and process them with **PySpark**.
- Implemented data **cleaning**, **transformation**, **validation**, and **aggregation** before storing processed datasets in **AWS S3**.
- Developed **SQL-based analytics** on customer, product, and sales data to generate business insights and support reporting.

Real-Time AI Student Attention Monitoring System

Python • OpenCV • MediaPipe • YOLO v8

- **Engineered** an AI-powered student attention monitoring system using **YOLOv8** and **MediaPipe FaceMesh** for real-time distraction, posture, and mobile usage detection.
- **Optimized** a low-latency computer vision pipeline using temporal smoothing, gaze tracking, and facial landmark analysis for real-time attention-state detection
- **Developed** an interactive Streamlit dashboard with live analytics, adaptive focus modes, and real-time behavioral feedback for productivity monitoring.

ACHIEVEMENTS & CERTIFICATIONS:

- Solved 350+ DSA Problems on LeetCode
- Achieved 1500+ LeetCode Contest Rating
- HackerRank Problem Solving (Intermediate) Certificate
- HackerRank SQL (Intermediate) Certificate
- Training: AWS Cloud Practitioner (CLF-C02) Preparation Course - Udemy
